## **ASBESTOS ABATEMENT AIRBORNE SAMPLE ANALYSIS REPORT**

**CLIENT:** Centennial School District  
433 Centennial Road  
Warminster, PA 18974

**LOCATION:** Log College Middle School  
730 North Norristown Road  
Warminster, PA 18974

**PROJECT NUMBER:** 5-18-21197

**CONTACT PERSON:** Mr. Tom Golden

**DATE OF REPORT:** July 22, 2018

**REPORT REVIEWED BY:**   
\_\_\_\_\_  
Jack F. Carney, President

## **EXECUTIVE SUMMARY**

EHS Environmental, Inc. was contracted by Centennial School District to provide sample collection and analytical services for airborne asbestos during and after the removal of specified asbestos containing materials at the Log College Middle School located at 730 North Norristown Road in Warminster, Pennsylvania.

This project entailed the removal of approximately:

- 27 pipe fittings from Room 203;
- 130 square feet of floor tile from the Mechanical Room 203;
- 14 fitting from Mechanical Room 46-0;
- 12 fittings from Storage Room 241;
- 27 fittings from Storage Room 240;
- 28 fitting from Storage Room 52;
- 58 fittings from Storage and Mechanical Room 112;
- 620 square feet of floor tile from Mechanical Room 230;
- 750 square feet of mastic from Mechanical Room 230;
- 211 pipe fittings from the Second Floor Hallway between Rooms 42 and 33/34;
- 11 fittings from Mechanical Storage Room 138;
- 85 fittings from Block C, Room L34 Boys Toilet-Plumbing Chase and Shower Area;
- 17 fittings from Block C, Storage Room 161;
- 100 square feet of floor tile from Block C, Storage Room 161;
- 130 square feet of mastic from Storage Room 161;
- 31 pipe fittings from the Wrestling Room Mechanical Area L34;
- 450 square feet of floor tile and mastic from Mechanical Room 46-0;
- 26 fittings from the Receiving & Maintenance Room 130.

Removal operations were performed by Power Component Systems, Inc. of Camp Hill, Pennsylvania. EHS was directed to removal locations by the client.

Results indicate that samples collected following removal activities (greater than (260) 40 linear feet or (160) 80 square feet) were below 0.00554 Fibers per cubic centimeter of air (F/cc), the current City of Philadelphia re-occupancy standard utilizing Transmission Electron Microscopy (TEM) for analysis. In areas were less than 40 linear feet or 80 square feet were removed; results indicate that samples collected following removal activities were below 0.00554 F/cc, the current City of Philadelphia re-occupancy standard utilizing NIOSH Method 7400, Phase Contrast Microscopy for analysis.

## **METHODS**

### **Asbestos Sampling**

Airborne asbestos samples were collected using calibrated equipment and NIOSH recommended sampling procedures. Asbestos fibers were collected on mixed cellulose membrane filters with 0.80 micron pore size mounted in a 3 stage filter cassette. Sample collection was performed in the open face position by drawing a known volume of air through the filter with a calibrated sampling pump. Final air samples were collected utilizing aggressive air sampling techniques.

### **Asbestos Analysis**

Airborne asbestos samples collected before and during asbestos removal were analyzed per NIOSH Method 7400 using the 'A' counting rules. This method identifies total number of fibers by Phase Contrast Microscopy using 400 x magnifications. This method does not distinguish between asbestos and non-asbestos fibers (i.e., fiberglass, mineral wool, cellulose, etc.). All fibers with a length to diameter ratio of 3 to 1 or greater and a length of greater than 5 microns are considered to be asbestos fibers and are counted as such. The NIOSH Method 7400 requires 5.5 fibers per 100 fields to be counted to be considered "detectable."

Air samples collected following removal activities, which were analyzed via Transmission Electron Microscopy (TEM), were analyzed at IATL Analytical, Inc. located in Mt. Laurel, New Jersey.

### **Asbestos Standards**

**OSHA Standard is 0.10 F/cc:** (applies to workers inside the work area and work area samples) 0.10 Fibers per cubic centimeters of air (F/cc) averaged over an 8-hour time period.

**Clearance Criteria is 0.01 F/cc:** (applies to samples collected inside the change room of the decontamination unit, outdoors, outside the work area, and final air samples collected following removal activities).

**AIRBORNE SAMPLING RESULTS**

**CLIENT:** Centennial School District

**PROJECT NUMBER:** 5-18-21197
